

## **Steelcase 2014 IT Summer Internships**

*For more than 100 years, Steelcase Inc. has helped create great experiences for the world's leading organizations – wherever work happens. Steelcase and our family of brands – including Coalesse, Turnstone, Nurture and other sub-brands – offer a full portfolio of furniture, related products and services designed to unlock human promise and support social, economic and environmental sustainability. Steelcase is a global, industry-leading and publicly traded company with fiscal 2013 revenue of \$2.9 billion and more than 12,000 employees around the world.*

Steelcase, Inc. seeks highly motivated, creative, and curious students within the information technology (IT) field of study for multiple internship opportunities. Candidates should be pursuing an IT-related degree (CS, CIS, MIS), and can be a current sophomore, junior, or senior with good technology skills. Your work assignment will be relevant to your development and reflective of the tasks that professionals encounter at Steelcase. **We have multiple opportunities!** As an intern, you would have the opportunity to work with one or more of the teams below and utilize your skills in the following areas:

- **Applications Development/Systems Analysis** – The intern would be responsible for performing small enhancements and/or project development work. There are opportunities to work within our extensive SAP installations as well as other application environments. This intern will gain experience doing application development work in a live business setting.
- **Project Management** – Work with project managers within the IT project management organization to support various IT projects and processes.
- **Product Data Solutions** – Interns will have the opportunity to work in an SAP environment and complete project work using SAP. These interns will work on projects supporting product and launch activities through analysis and development of technology software supporting engineering, marketing, and electronic specification guides.
- **Product Illustration** – This intern will work on our product graphics team and will assist in the automation of web graphics. We are looking for a student with strong problem solving skills and some exposure to XML and MS Access. An ideal candidate would be a student with an interest in computer graphics and graphical user interface development.

### **Infrastructure Internships:**

- **Collaboration Services** - This intern will help develop cloud computing architecture and help support our mobile and social application strategies. The application development in this role will be geared towards mobile devices, and the ideal intern will have some development experience.
- **Multimedia** – This opportunity will allow students to work closely with our multimedia team to provide support with different multimedia technologies throughout the company.
- **Technical Services and Operations** – This intern will have the opportunity to work in a variety of services to support the business including potential assignments for the network, database, and SAP basis/security teams.

- Basic router – switch configuration setup
- Exposure on the Cisco platform
- SQL Server
- Database

**Skills & Abilities**

Qualified candidates will be a graduate or current computer science/ information systems/ management information systems sophomore/ junior.

- Good analytical skills with attention to detail
- Ability to work well with a variety of people.
- Strong communication skills
- Team focused
- Demonstrate high work standards and initiative
- Expert in Microsoft Office skills
- A drive to learn and win.
