

Open-House for Potential Co-Op/Intern Engineering Applicants!

We're excited to announce that DornerWorks is hosting an open-house event to allow potential co-op/intern engineering applicants an opportunity to tour our facility, see examples of our projects, and to experience what it would be like to be a part of our DornerWorks team.

- The open-house will take place on Tuesday, October 28th, from 4:00-7:00 PM at our Grand Rapids location (3445 Lake Eastbrook Blvd SE, Grand Rapids, MI 49546).
- During this time, we would like to welcome potential co-op/intern applicants to arrive at their leisure, participate in a short tour, enjoy some free food, and casually engage current employees and/or co-ops/interns in order to see if DornerWorks could be the right fit for the next step in their career path. The sooner you arrive, the better glimpse you will get into what our daily work environment is really like.
- If you are interested in being involved in exciting, cutting-edge, and eclectic embedded engineering projects while working in a personal and casual work environment, DornerWorks would provide a perfect platform to enjoy and grow your engineering career. You can visit our website at www.DornerWorks.com to learn more about the company, our history, and our project focus.
- Additionally, please navigate directly to www.DornerWorks.com/Careers to determine if you meet our current co-op/intern engineering needs and qualifications and/or to apply for the position. If you feel like you are a good match, we'd especially appreciate you taking the time to investigate our company further at the open-house.

DornerWorks has a small-company feel with largely rewarding work. If this sounds interesting to you, please take advantage of this open-house to see what a great opportunity DornerWorks can offer you. Thank you very much for your consideration and we look forward to seeing you then!
