Programmer Analyst

General Description

If you are looking for an opportunity to creatively develop solutions, grow professionally as a coder, and work alongside an excellent team in a rapidly growing company, then Kamps Pallets may have the opportunity for you. The Programmer Analyst develops, tests, and documents computer programs, applying knowledge of programming techniques and computer systems. On top of excellent technical skills, the ideal candidate will have exceptional abilities to communicate with stakeholders and end users from all areas of the business to reach solutions that will bring our organization to the next level.

Essential Functions

- Responsible for maintenance and development of Kamps proprietary software.
- Consults with users to identify current operating procedures and clarify program objectives.
- Develops programs, using structured analysis and design. Submits plans to users for approval. Prepares flowcharts and diagrams to illustrate sequence of steps program must follow and to describe logical operations involved
- Produces scalable, robust, high-quality code
- Designs front end user interfaces
- Architects data models for back end storage using MS SQL server technology
- Responsible for overall user experience
- Writes manuals to describe installation and operating procedures for users
- Seeks user feedback on proprietary software and assists users to solve operating problems Recreates steps taken by user to locate source of problem and revises program to correct errors.
- May use computer-aided software tools, such as flowchart design and code generation, in each stage of system development
- Maintains source code control
- Trains users to use programs
- Other duties as assigned

Qualifications

- BS degree in Information Technology, Computer Sciences or related degree
- 2 years or more of relevant experience in a manufacturing environment
- Excellent communication skills translating current systems, processes and tribal knowledge into logical sequence for programming
- Angular JS
- C#, ASP.NET, MVC
- Javascript, JQuery
- HTML, CSS
- RESTful web services, SOAP web services, and WCF development
- IIS
- Microsoft SQL Server 2012 – TSQL, SSRS, SSIS
- Access

Preferred
- Previous experience with Microsoft Dynamics GP, Microsoft CRM, and SharePoint
- IOS and Android mobile development

About Kamps Pallets

Kamps is a family owned and operated Pallet Company. Kamps manufactures new pallets, reconditioned pallets and recycles unrepairable pallets into mulch and bark. Kamps Pallets has facilities throughout the Midwest United States, including Michigan, Illinois, Indiana, Ohio, and Kentucky.

Kamps is a values driven company. Kamps operates with integrity and respect for every employee. Kamps continuously looks for opportunities to reward, recognize and empower employees. There are many benefit opportunities within Kamps, including quarterly profit share, competitive wages, health and dental insurance, and 401K retirement plan. We are looking for employees who are willing to work hard within a team setting.
