

## Foresight Management 2018 Summer Internship Job Description

**Department:** Computer Science and Systems Engineering

**Position:** Intern

**Wage, Hours, & Duration:** \$10/hour, full-time (40 hours/week), 10 or more weeks

**Start & End Dates:** Flexible (May – August)

**Office Location:** 8516 Homestead Dr. Zeeland, MI 49464

**Job Summary:** Foresight is an energy services and energy management company that is focused on building long term relationships with businesses who operate commercial and industrial facilities. We offer a broad range of services including energy efficiency, energy management, facility audits, and utility consulting. The Foresight internship will primarily work with the software and data teams with some interaction with sales and operations.

### ***Internship Responsibilities/Requirements:***

- Develop new paths and systems for data collection through MySQL and PostgreSQL databases
- Maintenance and upkeep of existing utility data collection methods
- A working knowledge of Application Programming Interfaces (API)
- Comfortable with other development languages such as Ruby, JavaScript, and Python
- Data entry
- Project-based tasks with targeted deadlines set by teammates and clients
- Support of engineering and data teams
- Communication with customers and staff as needed

### ***About Foresight:***

*Foresight is a team of energy engineers, utility data analysts, software developers, customer service professionals, and data nerds who aim to champion energy management and build long-term relationships with our clients.*
