Software Development Internship (Web/Mobile Development)

Join PEC Technologies this summer in helping companies solve their most pressing business problems by building custom software applications. As an Intern at PEC Technologies, you will get to work with developers who are passionate about the latest technologies and their customers. You will help solve business challenges for a wide range of industries while building technical, communication and project management skills.

What it will look like
- The average work week is 20-40 hours/week.
- The internship is paid at $14-$16/hour based on skill.
- The internship will start in the first week of June and run through August.
- You will be assigned to an ongoing project where you will work on new and existing features.
- You will join the daily stand-up meetings and give status updates on your project.
- You will be assigned a mentor who you will work with directly throughout the duration of your internship.
- You will be working a mixture of in office and remote.
- Other benefits include team lunches downtown and team building exercises.

Requirements
- Computer Science major with some experience in Web Development is a plus.
- Good communication skills
- Someone who is willing to take on challenges and learn.
- Someone who is self-driven and highly motivated.

If you are someone who is passionate about seeing their code turned into meaningful software applications used by clients across industries, we would love for you to join us. Please email your resume to info@pectechnologies.com to apply.
