

Internship Opportunities 2023

SonSet Solutions is seeking people who are deeply committed to Christ and passionate about making an impact for God's kingdom. We need a team with diverse skills to advance the gospel worldwide - engineers, writers, software developers, media producers, and more. Our internships are hands-on and a unique opportunity to pursue on-the-job spiritual and professional growth while serving in a missions context. Join us to use your knowledge and experience to solve today's ministry challenges and help ministries around the world.

SonSet Solutions is an evangelical mission dedicated to providing technology-based solutions to advance the gospel worldwide. We assist front-line workers with analysis, development and implementation of designs and tools to expand the reach and deepen the impact of their work. For more information about SonSet Solutions, go to SonSetSolutions.org.

Summer 2023 Internship Positions

Digital Media

Engage with our media team to produce videos whose ultimate purpose is to help advance God's work and bring transformation to people's lives. Whether in the field or in our fully-equipped production studio, our goal is to produce engaging, focused, and deliberate videos that tell the story of what we see God doing. Check out our [YouTube channel](#) to see some of our work.

Software Development

Creative software design and development is at the heart of our technology, and is essential to our ministry efforts in a world where devices are becoming increasingly more powerful and interconnected. Our SonSetLink® technology for water and power system monitoring provides opportunity for software development internships in:

- Frontend & Web Applications** - develop the appearance, interactivity, and workflow of the SonSetLink websites used daily by our ministry partners and staff.
- Backend & Database Applications** – develop the structure, internal logic and flow of data within the SonSetLink platforms, the infrastructure crucial to sustaining the ministry of our partners around the world.
- Embedded Applications** – develop edge device embedded software for gathering and transmitting water and power related data in a reliable and efficient manner across satellite and cellular networks in remote locations.
- Mobile Applications** - develop the appearance, interactivity, and workflow of the SonSetLink mobile app. Expand the feature set to benefit maintenance teams who visit the well sites.

Electrical Engineering

Innovative and reliable electrical design and development is at the core of many of our technology-based solutions. These enable us to meet the unique ministry requirements of our partners. Electrical engineering interns apply electrical/electronic hardware and embedded software design and other creative skills to the development of these solutions. This may include technology research; hardware design, prototype implementation and testing; embedded software development; hardware and software integration and testing; and systems support and maintenance.

Broadcast Engineering

You can be part of assisting radio ministries around the world with support and development of their stations. Broadcast engineering interns apply a wide range of engineering skills to assist with the design, development, fabrication, maintenance and installation of radio transmission systems including studios, transmitters, antennas and power systems. Work side by side with experienced broadcast engineers on coverage studies, appropriate equipment selection, antenna fabrication and transmitter troubleshooting.

Communications and Public Relations

Our Communications/Public Relations team tells the stories and creates the communications that attract new and seasoned friends to the ministry. Interns assist in the creation and organization of these communication pieces, to engage the public and provide opportunities for them to join our prayer and financial support team. We are looking for interns with skills in writing, graphic design, and social media. Interns may also assist in the planning and execution of external events, meetings, and presentations.

Internship Summary

An internship at SonSet Solutions is typically ten to twelve weeks in duration, usually during, but not limited to, the summer months. You will work side-by-side with technical missionaries and volunteers at our facilities in Elkhart, Indiana, and live with one of our staff families. You must be an active follower of the Lord Jesus Christ

Although our internships are unpaid, you will receive room and board and a weekly stipend. Prior to starting your internship, we ask that you actively participate in raising the prayer and financial support needed for your service with us. We will guide and assist you in that process.

Next Step

To let us know more about yourself and get the application process started, [click here](#) or visit our web page at SonSetSolutions.org/students/. For summer 2023 internship offers, the early bird deadline for completing the application process is November 30, 2022 and the final deadline is February 28, 2023. If you have further questions, please email Charlie Jacobson at collegerep@SonSetSolutions.org or call our office at (574) 970-4252 ext. 275.
