

Electric Vehicle Engineering Pre-Internship

About Modine Manufacturing

For more than 100 years, Modine Manufacturing has been leading the way in thermal management providing the commercial, industrial, and vehicular markets with trusted systems and solutions to manage heating and cooling and improve air quality. At work in practically every corner of the world, Modine plays a major role in things you see every day.

About Internship on Demand

Internship on Demand is a career-launching platform helping college students find their first professional experience. Virtual "career accelerators" hosted on our platform build foundational industry and professional skills to open the door to professional opportunities with sponsor companies.

Application Deadline: May 19th

Program Timeline: June 12th - August 4th

Career Accelerator Details

This **8-week, virtual pre-internship** is designed to share the necessary skills for success at Modine Manufacturing. Work on a real-world project with the innovative electrical engineering team at Modine. Learn & demonstrate your skills directly to hiring managers at Modine Manufacturing.

- 100% virtual work with flexible hours to meet your schedule.
- **PAID** - 10-15 hours a week at \$15 per hour
- 1-2 hours of networking and mentorship per week with Modine Manufacturing engineers, recruiters, and leadership to increase the likelihood you land an internship there

Key benefits for students:

- Network with industry professionals at Modine to open up future internship or entry-level job opportunities
- Engineering-specific career advice, upskilling, and mentorship
- Collaborate with your team on a real company project using industry tools and best practices
- Earn to learn! Get \$15/hour and earn a Certificate of Completion

Who Should Apply?

- All levels of college students in engineering looking to work in or learn more about the electric vehicle industry (all engineering majors may apply, but electrical engineers are the primary focus).
