ABOUT GENTHERM:

"People know us as a thermal company, and we are — enthusiastically, passionately, proudly. We take immense satisfaction in our ability to use heating and cooling to create valuable solutions for people and businesses the world over. Yet, we are also much more. The expertise we've built in thermal has opened further doors. It has shown us new opportunities and new methods, and our portfolio now includes exploring and solving problems at the forefront of technology—how to improve the performance of energy systems, imbue our software with intelligence, link our products into smart networks, and more. But even as our products evolve, our commitment stays solidly the same: To better understand people's needs, so we can create better solutions."
