

GMB is currently seeking an intern to join our Innovation Team! This teammate will help bridge the gap between innovative BIM technology applications and practical project needs.

### **Why Work with Us?**

This is the part where most job descriptions jump into the responsibilities and requirements for the role being posted - and we'll get there shortly! But we like to start with the why instead of the what.

Our purpose is helping build strong communities through educational opportunity. We focus on projects within the educational ecosystem, from Pre-K through Higher Education and spaces in our community that support lifelong learning. Our team of educational planners, architects, and engineers get to work on a wide range of project types for a diverse set of clients, and we're proud of the impact that our work has on the lives and trajectories of students throughout the Midwest. Will you join us?

### **As an Innovation Team intern with GMB you will:**

- Build collaborative, professional working relationships within the team to explore and implement emerging BIM technologies.
- Assist in developing data-driven solutions that address clients' needs beyond traditional architectural and engineering services.
- Contribute to the evaluation and integration of disruptive technologies like AI, VR, AR, and blockchain into GMB's service model.
- Research new BIM tools and software to maintain GMB's competitive edge in technology.
- Join a hybrid work environment with the ability to work remotely or in one of our learning hubs as needed.

### **What qualities do I need to succeed in this role?**

- Pursuing Bachelor's degree from an accredited university
- Passion for the architectural engineering consulting field
- A drive for learning and growth
- A creative and innovative mindset with the ability to identify and implement technological improvements

### **What might set you apart from other candidates?**

- Working knowledge of Revit, AutoCAD, and Dynamo
- Experience with computer coding, including Python and C++
- Experience in developing and managing BIM standards
- Experience with ChatGPT (or similar AI) and PowerBI
- Excellent communication skills

**We might be a great match for each other if you are:**

- A self-starter with great time management skills who thrives in an environment with team-based decision making.
- An individual who strives to learn and grow, is motivated by their team's success and works hard to ensure it.
- Someone who enjoys trying new ideas and constantly improving.

**What you might also like to know is that:**

GMB doesn't operate within a hierarchical pyramid structure; instead we operate like a **network of teams** that come together around specific goals working toward our overarching purpose. We think this is a better way to work and help everyone reach their potential.

Finally, at GMB we embrace a **flexible workplace** that empowers each person to decide where and how they work best. Our inclusive, people-first culture encourages teams to collaborate, communicate and find fulfillment personally and professionally, regardless of location or schedule.

*This is a direct hire, seasonal position. Pay will be commensurate with experience. Must have current and continuing right to work in the United States without sponsorship. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, age, sexual orientation, gender identity or national origin.*
